01 December 2025

You have successfully completed your registration as a battery producer.

Your BPRN is BPRN12625. This number is also on your welcome page.

As a registered battery producer you have obligations to provide us with data.

For Industrial and/or Automotive producers you must provide us with data on the amount of batteries you place on the market and the batteries you have been responsible for taking back and sending for treatment at an approved battery treatment site. You must provide this information by 31 March following each compliance year. Your first submission is due by 31 March 2026.

For producers of portable batteries you must provide us with data on the amount of batteries you have placed on the market during 2025 and then annually following the end of each compliance year. Your first submission is due by 31 January 2026. You will also need to pay us an administrative charge by this date. This charge is currently set at £30 and you will need to send us this amount when you submit your data.

You must notify us if the types of battery you place on the market change within a year. You must also tell us if you are a producer of portable batteries and the amount you put on the market exceeds 1 tonne within the compliance year. If you place more than 1 tonne of batteries on the UK market in any compliance year you must join a batteries compliance scheme.

Please keep your login password and PIN secure, and remember you will need these to login and submit your data.
